ATTACHMENT B

SURVEY OF FORMER STUDENTS OF THE CS NAME CHECK COURSE

- STATISTICAL RESUME -

Questionnaires sent out	131
Responses	90 (or 68.8%)
Of the 90 respondents, were not at the time of the survey engaged in biographic research	16 (or 15.5%)

The following responses (questions 4a, b, and c) assist in determining the purpose for which the biographic research (name check) is performed.

Please note: Respondents may be performing one or all of the types of tasks described below:

- |  |               |
|--|---------------|
| a. To prepare forms and submit cases for POA/OA or PCSA/CSA procedures | 44 (or 58.8%) |
| b. Support Counterintelligence case work                               | 43 (or 47.7%) |
| c. Support target studies or respond to other operational inquiries    | 53 (or 58.8%) |

The following responses (questions 4d, e, f, g, h) assist in determining the researchers actions upon completion of the recovery of biographic information.

Please note: Respondents could respond positively to more than question. The figures, then, may indicate that the respondent may in some cases take one action and in other cases take another action.

- |  |               |
|--|---------------|
| a. The job cannot be described as research (4d). The respondent is asked to find specific files or documents as directed.                            | 6 (or 6.6%)   |
| b. The researcher finds all pertinent files and documents and submits them in un-collated form to others who then prepare final collation and report | 11 (or 12.2%) |
| c. The researcher collates and interprets files and documents and prepares a resume, but not a final report (4e and f).                              | 14 (or 15.5%) |

- |  |               |
|--|---------------|
| d. The researcher completes his research, collates and interprets the information and prepares either draft or final form of a report to a superior other than his own. (May include other agencies, field stations, etc.) | 59 (or 65.5%) |
|--|---------------|
